MESSAGE TO SOCIAL CREDIT WOMEN'S AUXILIARIES

For the past thirty-six years the affairs of our province have been administered by a Social Credit Government. During Social Credit's term of office, Alberta became one of the leading provinces of Canada. Many programs were introduced that became model legislation and were later adopted by other jurisdictions.

Sound and sensible administration encouraged the development of our province and made it a land of opportunity and challenge.

Alberta's position is the envy of other provinces and it can truly be said "Alberta — the province that Social Credit built."

The strong support of our women has been a real factor in our past success.

Our situation has now changed. We are not the Government but we are the Official Opposition. As loyal Canadian citizens, resident in the Province of Alberta, we will be just as concerned and interested in the welfare of our people.

I pledge myself to work for the principles of Social Credit and to support those measures that are in the best interests of our people.

We need your help in establishing good communications between our elected members in the legislature and the people. The Social Credit Women's Auxiliaries can play a very important part in maintaining contact in the future between our members and the people as they have done in the past.

There is much that needs to be done; much that can be done. We appreciate and thank you for your untiring efforts. I encourage you to keep up the good work.

It is a pleasure for me to welcome you to our thirty-fourth Annual Convention. May we enjoy a strong sense of unity of purpose as we work together in 1972.

Harry E. Strom,
Leader
